SharePoint Solutions

The MBIT team are experts in SharePoint development and administration. We can transform your intranet into a complete information and collaboration portal that will save you time and increase productivity.

Cloud Services

Do you need to implement a secure reliable cloud solution? MBIT is a certified Microsoft Cloud Services Provider that can provide the following services specifically configured for Federal or State Government use:

- Microsoft 365
- Azure
- Cloud Migration
- Dynamics 365
- SharePoint

Business Intelligence

When it comes to data, how many times have you asked yourself, Where is it? Is it right? How do work with it? Or maybe you just need a better solution to visualize, report and make data-driven decisions faster and easier than you thought possible. We offer:

- Data Migration
- Data Visualization
- Data Centralization
- Data Reporting
- Data Analytics

What makes us different?

We focus on the 90% you don't see...

What makes an iceberg so dangerous is not what you see from the deck of the ship, it's the 90% below the surface that makes it so formidable. We realized the same thing when it comes to IT environments, and it's affects on productivity and efficiency. That's why we operate from a "Make it work, THEN make it pretty" philosophy. When we implement a solution, we will make sure it works first, then make it visually appealing and easy to use.
